

# Nador West Med: the Mediterranean port of tomorrow

- ▶ Announced in 2012 by His Majesty King Mohammed VI, as part of the 2030 National Port Strategy, the new port of Nador West Med is an integrated port complex, designed to ensure the Kingdom's energy supply, strengthen Morocco's petrochemical industry and further develop container transshipment capacity.
- ▶ Located on the strategic site of Betoya Bay, on the western side of the Cape of Three Forks, Nador West Med lies 250 nautical miles from the Strait of Gibraltar. As such, it draws on the immediate proximity of major East-West container and oil shipping routes.
- ▶ Eventually, Nador West Med will contribute to accelerating the economic and social development of Morocco's Oriental region and consolidate its maritime and port vocation.
